HOMETOWN TO WORLDWIDE

Draper® brings unmatched breadth of solutions, depth of knowledge, and manufacturing capabilities to every project. You can trust us with your comfort, security, and privacy in the most important place of all: home.

- We know the importance of home. Unlike many manufacturers, we have chosen to remain in our hometown community. Founded in Spiceland, Indiana, in 1902, Draper remains committed to U.S. manufacturing.
- Draper manufactures all of our window shade products in our 400,000 square foot facility in Spiceland.
- Draper has over 700 locally-based employees.
- Draper manufactures solar and roller shades with high quality fabrics, many woven in the USA by Phifer® and Mermet®.
- Draper continues to invest in the people, advanced production equipment, and manufacturing processes required to keep up with our commitment to manufacture high quality shading products with short production schedules, and deliver them when you need them.

The Magic of Motorization

MOTORIZED FLEXSHADE® ROLLER SHADES

Motorized FlexShade® window shades enhance your home design, provide a layer of heat gain protection and light control, and protect your valuable décor and furniture from fading.

Motorization offers the ultimate in convenience and efficiency, plus adds value to your home.

Motorized FlexShade® with RTS Ultra-quiet Sónesse®. Fabric: Mermet® E Screen™ in 3% White Pearl. Private Residence. Architect and Photographer: Dru Furbee, AIA, LEED® AP

Interior Motorized Options

Draper® has a wide range of motor options for shading installation, including high voltage, low voltage, and battery motors.

MOTORIZED FLEXSHADE® AC - 120V SHADES

For conventional wiring applications, new construction, or where wiring already exists.

- Draper® AC hardwired motorized shades are UL listed. Each version is available with hundreds of fabric colors and openness choices, and with hardware options to fit with any style or need.

MOTORIZED FLEXSHADE® LOW-VOLTAGE SHADES

Low-voltage window shades are quiet, consume less power, and require less wiring by an electrician.

- Low-voltage shades are easy to integrate with home automation or lighting control systems, ensuring your shades are always where they need to be and providing you with long-term, worry-free performance. They are available with the same fabric and hardware choices as all Draper shades.

MOTORIZED FLEXSHADE® BATTERY MOTORS

Enjoy the convenience of motorization without the hassle of wiring or need for electricians.

- This battery-powered window shade offers the convenience of motorization most anywhere. Choose from two battery options: a re-loadable battery wand, or a rechargeable Li-ion battery motor. Somfy® wireless RTS controls make this shade simple to program and easy to use.

DUAL ROLLER FLEXSHADE®

Who says you can't have it all? The Draper Dual Roller FlexShade® allows two shades in the same window.

- Enjoy the comfort of glare-free natural light during the day, and privacy and security in the evening.
- Dual roller shades are available with all Draper motorization and control options.

Interior Hardware

Hardware and accessories fit seamlessly into your design aesthetic to enhance your shade performance and experience.

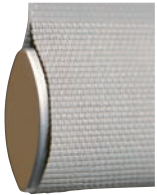

HEM BARS

Bottom shade weight. Other hem bar options are available depending on motor selection and size.

Hem Bar Sealed End

1" aluminum elliptical slat inside of a 1 5/8" pocket with heat sealed ends.

Hem Bar Open End

Plastic hem bar endcaps provide a finished look. 1" aluminum elliptical slat inside of 1 5/8" heat-seamed pocket with open pocket ends. Plastic endcaps on hem bar.

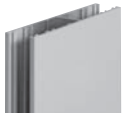

FASCIA

Dual Roller Fascia

Hides inner-workings and mounting hardware for a clean look. The fascia uses no exposed fasteners. Available as single fascia or dual.

SIDE CHANNELS

"H" Channel

"L" Angle

"U" Channel

Help reduce light infiltration on sides and sill. Not available with all products.

HEADBOXES

Hide the shade roller in plain sight or above the ceiling with a headbox.

- The unobtrusive **Surface Headbox** comes in colors (see below) to match your décor. Custom colors are also available.

- The **Pocket** and **Type D Pocket** headboxes create an above-the-ceiling pocket to conceal the shade when open, with only a small opening for the fabric.

- If there is an existing pocket in place, our simple wall clips and closures help hide the shade roller from below while leaving a space for the fabric to descend.

BRACKETS & COVERS

Mounting brackets install to face, ceiling, or jamb. Plastic bracket covers attach to brackets for a sleek, contemporary look that fits any design aesthetic. Bracket covers available in white or black for 120V motors; white only for 24V and battery motors.

Universal Mounting Bracket

With White Bracket Cover

HARDWARE COLORS*

Thermally bonded for superior adhesion, standard powder coat colors are lightly textured in black, white, ivory, or charcoal bronze. Clear anodized and silver have a smooth finish. Custom colors available on request.

*Digital sample of actual colors may vary slightly.

Interior Controls & Accessories

Whether you want simple wall switches, a handy remote, voice control, or integration with your smart home, we offer solutions that are reliable and simple to use.

Draper@Home motorized and battery-powered shades use industry leading Somfy® motors and controls. Radio Technology Somfy® (RTS) is the Somfy exclusive control platform which enables users to adjust motorized interior window coverings and motorized window products from virtually anywhere.

Manual Roller Shades

CLUTCH FLEXSHADE® NEXD

Draper® also offers non-motorized solutions if automation is not desired. The manual Clutch-Operated FlexShade® NEXD is durable for demanding applications, easy to use, and maintenance free.

- Clutch FlexShade NEXD provides light control with Bead Chain Clutch with your choice of fabric options and optional fascia. Available in sizes through 12' wide, depending on fabric selection.

FlexShade® NEXD small

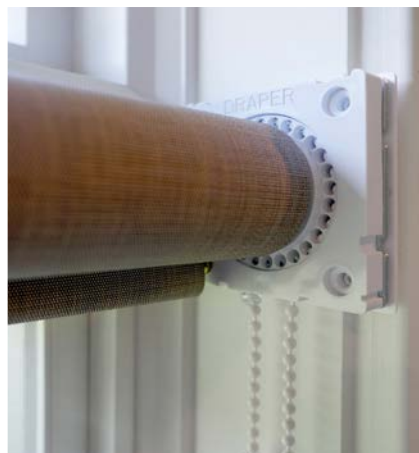

FlexShade® NEXD large

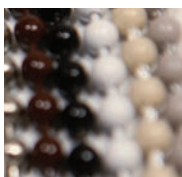

Dual FlexShade® NEXD
(shown in both color options)

BEAD CHAINS

DETAIL: fascia cover removed to show roller and bracket.

Operating chain for clutch shades. Stainless steel standard, or powder coated metal chain in custom colors. Optional plastic in grey, bronze, black, ivory, or white.

Spring Cord
Tension Device

Keeping Children Safe

Safety matters! Each Draper@Home FlexShade® NEXD comes with a spring-loaded chain tension device to keep the bead chain taut to prevent children and pets from getting their heads stuck in the loop. This device complies with the ANSI/WCMA A100.1 safety standard. Available in natural (clear), white, tan, bronze, black, and silver.

Hold downs are also available to secure bottom hem bar; especially useful with shades installed on a door.

HEM BARS

A hem bar is weighted to help stabilize the shade. Comes with plastic endcaps. Other hem bar options are available depending on motor selection and size. All hem bars are available in standard colors (see page 9).

Left to Right:

Exposed Hem Bar Small Rectangular $\frac{7}{8}$ " x $\frac{5}{16}$ " aluminum rectangular.

Exposed Hem Bar Large Rectangular $1\frac{1}{2}$ " x $\frac{5}{16}$ " aluminum rectangular.

Exposed Hem Bar Round $\frac{3}{4}$ " aluminum round.

Advantages of Outdoor Shading

Comfortable outdoor spaces are more important than ever. Use shades to expand your home's usable square footage year-round.

Easily create inviting outdoor spaces that are protected from the sun, wind, rain, and even insects with Draper® outdoor shades. Control options range from switches to handheld remotes to integration with lighting and other smart home systems.

EXPAND YOUR HOME

Create more outdoor moments and add to your climate-controlled living space without the cost and hassle of an addition. Enjoy outdoor workspaces, elegant areas for entertaining, or relaxing niches on decks and in outdoor rooms despite rain, wind, cold, or heat.

MAKE IT YOURS

Outdoor shades are customizable to your needs. Use them to create the outdoor space you desire. Outdoor shades can:

- Control temperature, saving HVAC costs and enhancing comfort.
- Block the effect of UV rays.
- Control glare; enhance your audio/visual experience.
- Increase privacy.
- Control insects.
- Add value and beauty to your home by increasing the usable space.

PROTECT YOUR INVESTMENT

Draper® FlexShade® ZIP outdoor shades are wind tunnel tested to stand up to what mother nature throws at you. The “zipper” feature holds the fabric in the side channels, keeping out wind, rain, and insects.

PREVENT DAMAGE OR INJURY

Do you live along a golf course or other amenity where flying objects are a concern? Outdoor shades can prevent golf balls or other objects from coming in contact with friends, family, and glass windows.

In this photo, an outdoor dining area with FlexShade® ZIP enclosure (no glass windows) maintains a comfortable temperature from the outdoors with shades down and heaters on.

For results of Draper shades in wind tunnel tests, see our White Paper “FlexShade ZIP versus the Wall of Wind.”

www.draperinc.com/whitepapers_casestudies.aspx

Outdoor Options

MOTORIZED FLEXSHADE® ZIP

Filter harsh glare in outdoor covered spaces, such as pergolas, pool houses, patios, or other outdoor structures to provide a comfortable environment for guests and family.

FlexShade® ZIP: The unique ZIP detail keeps the fabric firmly in place and provides protection from wind, weather, and insects.

- The obstacle detection motor prevents damage, extends the life of the product, and ensures safety of small children and pets.

Draper FlexShade® ZIP XL shades are available up to 25' wide.

MOTORIZED EXTERIOR FLEXSHADE®

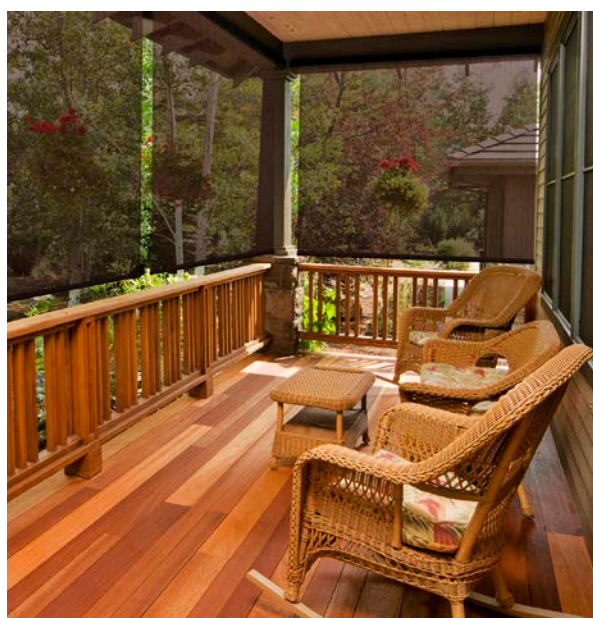

These convenient and easy-to-use motorized shades mount directly over the outside of your windows.

Motorized Exterior FlexShade® will provide a comfortable space by reducing interior heat gain and glare.

- Side channels or cable guides keep the shade fabric in place.

Large shade, small footprint.

Motorized Exterior FlexShade XL up to 192" wide, in only a 5" headbox. Our ability to provide large shades in a small, sleek headbox is unique among North American manufacturers. Choose from angled and curved headbox style.

EXTERIOR CLUTCH-OPERATED FLEXSHADE®

Nothing beats sitting on one's own patio or porch area, sipping a beverage, relaxing. It can be a pleasant way to connect with nature, except when the sun is reaching into your retreat.

The Clutch-operated Exterior FlexShade blocks glare while still retaining a view through to the world beyond. The bead chain provides simple operation and cable guides keep the shade fabric from blowing in the wind.

Outdoor Controls & Accessories

FLEXSHADE® ZIP COMPONENTS

Side Channels for FlexShade® ZIP

Designed to secure fabric within the channels and control insect and light penetration.

FlexShade® ZIP hem bar

Weighted to help stabilize the shade, and ensure smooth operation during windy conditions.

FlexShade® ZIP fabric attachment

Keeps shade firmly in place; stops rain and insects.

Obstacle Detection Motors

All ZIP shades come standard with obstruction detection motors. As soon as the hem bar touches an obstacle, the motor stops.

Telis 4 Channel Remote

Control can be as simple as a handheld remote. Sun and wind sensors respond to current conditions to deploy or retract the shades. Integration devices bring the system into your existing smart home setup.

EXTERIOR FLEXSHADE® COMPONENTS

Above: Square Headbox

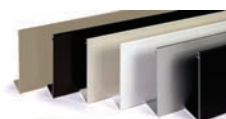

Headboxes for FlexShade® ZIP and Exterior Motorized FlexShade®

3 styles of durable and attractive headboxes that contain and protect the shade and operator. (Shape availability depends on product.)

Side Channels for Exterior FlexShade®

Prevent wind from affecting the shade; stops light penetration.

Fascia for Exterior Clutch-Operated FlexShade®

Hides the clutch and roller; fits in with your outdoor aesthetic.

Cable Guide for Exterior Clutch-Operated FlexShade®

Secures hem bar in place for proper operation and protection of shade.

RTS Sun Sensor
Hardwired (Bottom)

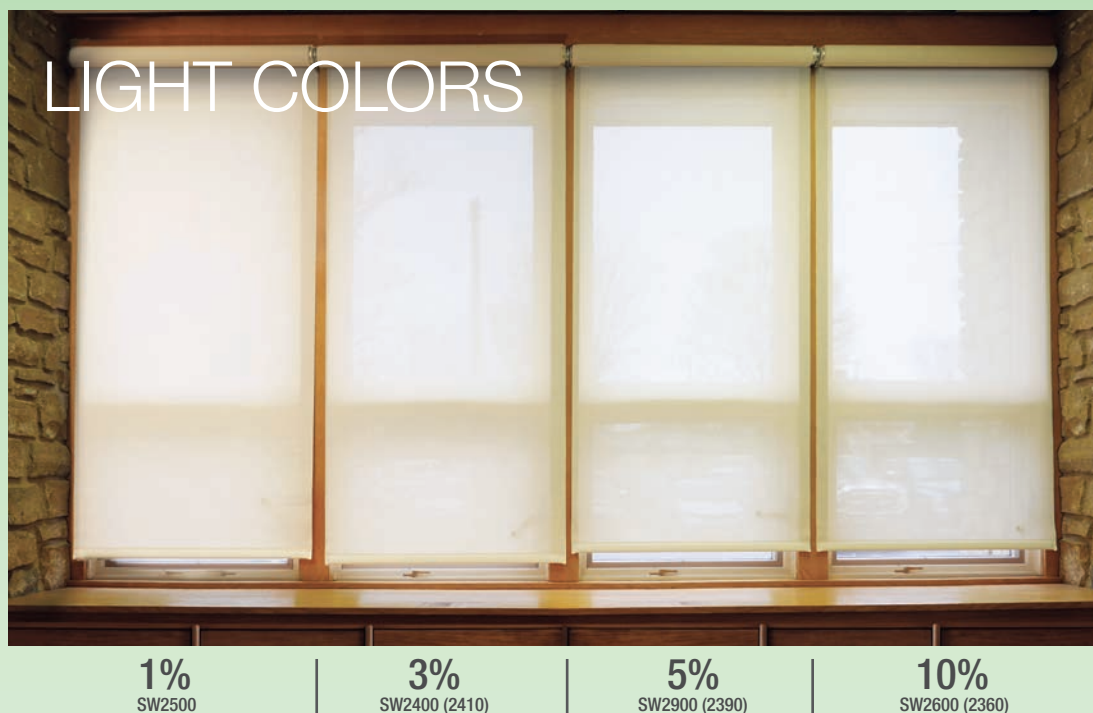

EOLIS sensor RTS: Radio sensor for shades, to protect against wind damage.

Choices: Fabric Openness

Fabric color and weave openness will have a dramatic effect on the room and view. Lower openness percentages are more opaque, whereas higher numbers are more translucent. Darker colors provide better view-through as the eye is naturally drawn to the outside light source.

This example shows the impact of different colors and openness factors in the same window. This can also be demonstrated in real time using the **OPENNESS TOOL** included in your **Draper@Home Kit**.

Choosing Fabric Style

VARIETY OF STYLES

Draper® offers an unmatched spectrum of beautiful and functional fabric colors and styles to solve any performance or aesthetic challenge.

Woven mesh fabrics protect against heat, glare, and UV rays, while maintaining a view. Soft, translucent textiles offer designer appeal. Opaque fabrics eliminate visible light and provide privacy. Draper products are proudly designed, engineered, and assembled in the USA, often using fabrics made in the United States.

Solar

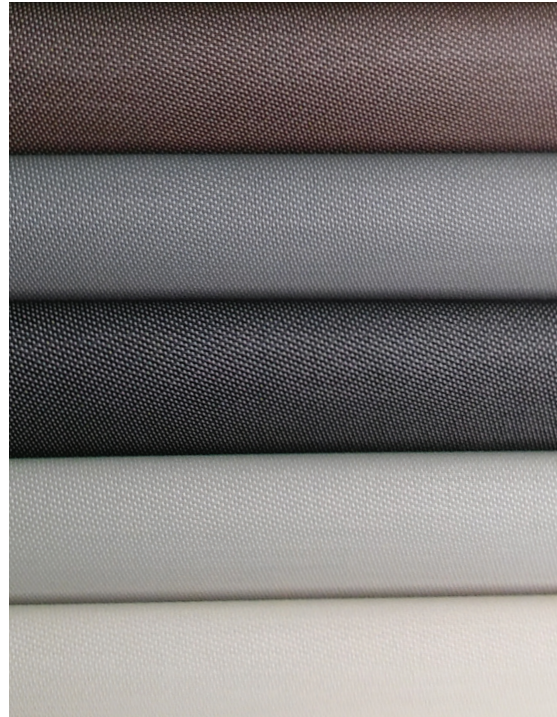

Woven solar fabrics reduce heat and control glare while preserving a view to the outside.

Decorative

Translucent fabrics that add to any residential décor.

Privacy

Provide privacy and darken rooms. Ideal for bedrooms and bathrooms.

SHEERWEAVE® FABRICS

Phifer® provides solar, decorative, and privacy fabrics woven in Tuscaloosa, Alabama.

Sun Control Textiles™

SUN CONTROL FABRICS

Quality solar, decorative, and privacy fabrics from Mermet® in South Carolina.

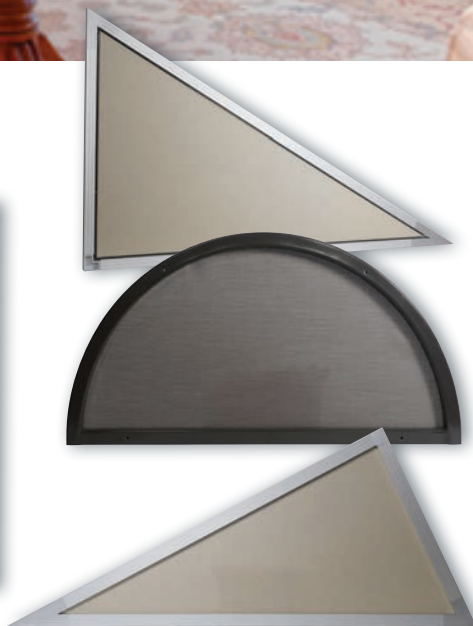

For our complete catalog of fabrics, visit: draperinc.com/windowshades/fabricoptions.aspx

Unique Shapes, Unique Solutions

Arch-shaped Fixed FlexShade® Panel

FLEXSHADE® PANELS

Not all windows are a standard shape.

Fixed FlexShade® Panels offer a non-operable sunlight filtration system that is perfect for hard-to-reach places such as skylights, sloped windows, or odd-shaped openings: triangle, gabled, 5-sided, or arched panels. Install on the interior or outside.

Tailored Printing

DIGITALLY PRINTED FLEXSHADE®

Open up even more possibilities for your shades using our ability to print custom colors, patterns, and graphics on shade fabric.

Want a custom shade color or pattern to match your home design? Give us the Pantone® or Sherwin Williams® color number and we will match it. Or send us color samples and we will create the perfect custom color shade to fit right in. You can also supply your own designs, artwork, logos, or patterns*.

We use water-based latex inks that are UL ECOLOGO certified and GREENGUARD GOLD certified for no off-gassing. They also contain UV inhibitors to protect against fading.

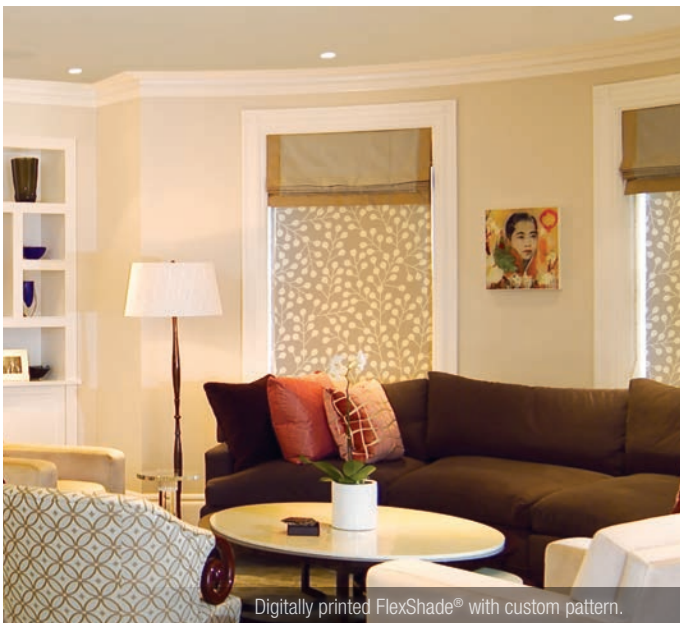

Your home is important to you, so you can't leave anything to chance. Don't worry, neither do we! Our knowledgeable in-house designers and high-tech digital printers ensure the highest quality control using a backlit inspection table and a dedicated light booth for critical review.

Pick a Pantone or Sherwin Williams swatch to match.

Large format printer at Draper.

Digitally printed FlexShade® with custom pattern.

Digitally printed FlexShade® in custom color.

*Copyrighted artwork requires permission to reproduce. White fabric is required to print graphics. Graphics can be printed on either side of the shade. Not all fabrics are printable. Contact Draper for details.

Metal Shading Systems

OUTDOOR VENETIAN BLINDS

Make a design statement while providing comfort and privacy.

Draper® partners with the world's leading exterior Venetian blinds manufacturer, Germany's Warema, to deliver the best protection from glare and solar heat gain. Venetian blinds stop the sun before it gets to the window.

- The ability to extend, retract, and tilt the slats to control direct light at any angle gives your home the perfect balance between natural light and heat control.
- Venetian blinds are available in a range of colors and installation types to fit perfectly into your home's aesthetic, while adding a modern and artistic touch.

Private Residence. FlexLouver™. Photography: Heidi Grassley, Paradise Coast Art.

FLEXLOUVER™ RACK ARM SYSTEM

This shading system finely tilts open or closed to control the light levels within a space.

- Designed to control solar energy, light, and glare, the FlexLouver™ Rack Arm System features an operable louver system for interior or exterior use, with years of dependable service with minimal maintenance. Perfect for difficult glazing situations.
- The ability to tilt the slats to control direct light at any angle gives your home the perfect balance between natural light and heat control.
