

EXPAND YOUR HOME

Create more outdoor moments and add to your living space without the cost and hassle of an addition. Enjoy outdoor workspaces, elegant areas for entertaining, or relaxing niches on decks and in outdoor rooms despite rain, wind, cold, or heat.

MAKE IT YOURS

Outdoor shades are customizable to your needs. Outdoor shades can:

- Control temperature, saving HVAC costs, and enhancing comfort.
- Block the effect of UV rays.
- Increase privacy.
- Control insects.
- Add value and beauty to your home by increasing the usable space.

Outdoor Shading Solutions

Draper® **FlexShade® ZIP** creates a sealed enclosure to provide protection from the wind, harsh glare, uncomfortable temperatures, rain, and insects.

It's like being outdoors without being in the outdoors!

Below, an outdoor dining area with FlexShade ZIP enclosure (no glass windows) maintains a comfortable temperature from the outdoors with shades down and heaters on.

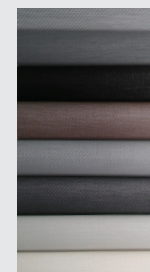

Sun-controlled comfort

Stop solar heat gain before the sunlight hits the windows. The **Exterior Motorized FlexShade®** window shade combines convenience and ease of use with a wall switch or remote.

Make the most of shades

Wall switches, a handy remote, or integration with your smart home: we offer shade control solutions that are reliable and simple to use.

Draper shades are available in beautiful and functional fabric colors and styles to solve any performance or aesthetic challenge.
